More Information: Visit <http://clear.uconn.edu/projects/cri>

Data source: USGS National Elevation Dataset (NED). NED is an image dataset where each pixel has an elevation value and represents a square on the ground that is 30 meters (about 100 feet) on a side. The data is displayed as a painted relief map. Visit <http://ned.usgs.gov> for more information about the NED dataset.

This project was funded in part by the CT DEP through an EPA Clean Water Act Section 319 Nonpoint Source Grant. NEMO is an educational program of the Center for Land use Education and Research (CLEAR) at the University of Connecticut.

These maps are intended for general information and planning purposes only. They contain no authoritative positional information.
