

## EMS Site Move Information Sheet

### Overview

Administrative Offices for Enfield Emergency Medical Services (EMS) have moved from a temporary location within the Enfield Police Department. To maintain the level of network services provided at EPD, a Wide Area Network link was installed between the new location and the Town of Enfield Network. To minimize the costs associated with installing wired connections within the building, the newly installed staff wireless switched network was extended to the new location. Through this connection, staff at the EMS site has access for data storage, Exchange based email, Internet and Intranet, wireless printers, and the Police Records Management System (PRISE).

### Highlights

- Secure wireless access to network resources
- WAN link to Town Hall
- Installation costs minimized through the use of wireless technologies

### Interaction with Other Systems

- PRISE
- Outlook/Exchange based email
- Internet/Intranet
- Centralized data storage

### Project Details

- Project # 07-3907
- Implemented March 26, 2007
