

Network Growth Information Sheet

Overview

The Town of Enfield is constantly growing and with the growth comes the need for additional network connections. The Town IT Department moved forward with its plan to constantly stay ahead of the curve by deploying network equipment with the availability of additional connections.

The IT Department reviewed all areas of the Town infrastructure to determine the Town's future needs for network resources. After a thorough review, identified equipment was upgraded to accommodate for those future needs. The equipment remains top of the line and will continue to serve the Town.
