Hi Georgienna,

Just a last followup to see if you've come up with the 2016 traffic study. I haven't been able to figure out how to access older town meeting documents online. I was thinking the proposal to move Montessori to the Felician Sisters property might contain the info I was interested in, regarding whether the study was done before or after the Enfield High consolidation. Covid unfortunately caught up with me last week, so I haven't been well enough to do much more research on my own. If we can't find anything else, I'll just include my inquiry in a letter to be read at Thursday's meeting.

Thanks!  
Jen Stephens

I did see that, but thought there would be a complete report from 2016 with dates of when the traffic study was conducted. Since the new proposal is using the 2016 data I'd like to know the specific date range that the traffic was observed. I'll keep searching online.

Thanks, and have a nice long weekend!

Hi Jen,

Did you see the 2016 data under Appendix A by chance? The sentence on page three references Appendix A Figure No. 2, as "Through consultation with the CTDOT Planning Division, Fuss & O'Neil, utilized the approved 016 build condition traffic volumes from the Montessori School TIS as shown in Figure No. 2 of Appendix A..."

Is that data what you are looking for?

Hi Georgienna,

Thank you for the attachment, but actually what I'm looking for is the 2016 Traffic Study that was completed before Montessori moved to the Felician Sisters property. It is referenced in the report you attached here, on page 3 under "Traffic Counts and Volumes".

Thank you again for your assistance,

Jen

Good afternoon Jen,

This is the traffic study they are referencing.

Thank you

**Subject:** PH#3040MA - Question about Traffic Survey

External Email: Use Caution when opening attachments or clicking links.

I have searched the town website and Googled for quite a while and I haven't been able to find the referenced 2016 traffic survey that has been used to predict future traffic patterns if the Felician Sisters project moves forward. I'd just like to know when exactly the study was conducted, as it occurred to me while watching the latest meeting that the first consolidated Enfield high school class began in September of 2016. Were the addition of hundreds of high school students and educators, along with the increase of buses considered in that study? As well as the increased use of Bridge Lane for buses leaving Enfield Street School that seems to have risen dramatically in the past few years? I haven't seen much mention of Bridge Lane in these proceedings, but the traffic flow on Enfield Street during the beginnings and endings of school days and the buses using it from Enfield Street School have created a huge problem along the front of the Felician Sisters property, with backups both on Enfield Street and long lines of cars trying to turn either way from Bridge Lane to Enfield Street. These problems will most certainly be compounded with the addition of a huge housing complex.

I will be submitting a formal letter for the record before the next meeting, but I would really like to know how to locate the traffic study, or at least to know the dates in which the study was conducted rather than just the year it was released.

Thanks very much,  
Jen Stephens
