Dear Bill,

Per your request, I have reviewed the Proposed ATM Plan prepared by The Colvest Group, LTD dated 6-22-2022 and calculated the impervious coverage for both the as-built condition and post development condition upon completion of the construction of the ATM. My calculations confirm that the proposed modifications associated with the ATM will result in a reduction in impervious coverage of approximately 12 square feet. The resulting percentage of impervious coverage (rounded to the nearest 1/10th of a percent) will remain unchanged. If there are any questions, or you require further information, please call our office at (860) 623-0569.

Sincerely,

Timothy A. Coon, P.E.
